Remaining foam remover of cleaning solution

- ▲ Cold and hot water resistant concentrated foam crusher
- ▲ Prevent the formation of excess foam in floor cleaning machines

Area of application

Residual cleaning solution foam crusher for water vacuum cleaners, floor cleaning machines and extractors.

Application

Before the first use, check the surface durability of the material to be treated. Apply a small amount in an inconspicuous place. Shake the product before use!

Foam crush:

Add a few drops of the product to the suction tube under running engine conditions. When using large area floor cleaners, according to the volume of the tank, dilute 100-200 ml of the product in 1-2 liters of water, add this solution to the tank with the remaining solution.

Note

The manufacturer accepts no liability for damage caused by improper or unqualified use of the product. For professional use only!

Ingredients (according to 648/2004 / EC)
